Technical Skills

Programming:

React.js, Redux.js, CSS,
JavaScript, Node.js, Express.js,
Laravel, Python, Django, C++

Databases:

MongoDB, MySQL, Oracle,
Apache Cassandra, Redis, Neo4J

Data & AI:

Machine Learning, Deep
Learning, Big Data

Other:

UML, Git/GitHub, Docker, Object-
Oriented Programming (C++,
Python, Java), LLM tools

Education

Scientific Baccalaureate

Physics

2021-2022

Specialized Technician Diploma in Digital Development – Web Full Stack

ISTA – Institute of Applied Sciences and
Technologies

2022-2024

Engineering Degree in AI and Data Science (In Progress)

EMSI – Moroccan School of Engineering
Sciences

2024-2027

Professional Summary

Computer engineering student specializing in Artificial Intelligence and Data at the Moroccan School of Engineering Sciences (EMSI), with a strong foundation in full-stack web development. Experienced in building web applications using JavaScript, React.js, Node.js, Laravel, Django, and Python, as well as managing SQL and NoSQL databases. Skilled in Machine Learning and REST API development.

Projects

Minibus Rental System - MVR

React.js, Tailwind CSS

A web application for managing minibus reservations with a user-friendly interface. Includes a booking calendar, price calculation, vehicle availability tracking, and an admin panel to manage vehicles, users, and routes.

MyTravelCircle - Tourism Platform

Python, Django, TailwindCSS

MyTravelCircle is a collaborative web platform designed to promote Moroccan tourism. It allows users to discover hidden gems, share their travel stories, and contribute to a growing database of local attractions.

Lexiva AI - Research Assistant

FastAPI, LangChain, React.

Conception et implémentation d'un système d'analyse multi-documents basé sur les LLMs pour la synthèse de publications scientifiques. Mise en place d'un pipeline en deux étapes (extraction parallèle + synthèse globale) avec structuration des sorties en JSON.

Sign Language Real-Time Translation System

Python, TensorFlow/PyTorch, OpenCV, CNN

Developed a real-time sign language translation system using CNNs to recognize hand gestures and convert them into words and sentences. Implemented a computer vision pipeline for real-time prediction, improving accessibility for deaf users.

E-Commerce Data Lakehouse Platform

MinIO, Airflow, Snowflake, Snowpark, XGBoost

Designed and implemented a modern Data Lakehouse using Medallion Architecture (Bronze, Silver, Gold), with both on-premise (Docker, MinIO, Airflow) and cloud (Snowflake, Snowpark) architectures. Integrated an XGBoost smart-pricing model and a Streamlit dashboard for sales analytics and KPI visualization.

AI-Powered E-Commerce Product Intelligence

Django, ReactJs, XGBoost, FastAPI, PostgreSQL

Developed an AI-driven platform for e-commerce product research and sales optimization, combining Instagram competitor data, historical COD orders, and advertising metrics. Implemented an XGBoost model to identify and rank the top-performing product concepts, with automated data pipelines and an interactive React dashboard.

Certifications (via Coursera and others)

- Specialized Technician Diploma in Full-Stack Web – ISTA (2024)
- The Unix Workbench – Johns Hopkins University (Linux)
- Interactivity with JavaScript – University of Michigan
- Oriented Programming (C++) – EPFL
- La recherche documentaire - Ecole Polytechnique
- Python for Data Science, AI & Development - IBM
- Software Engineering: Software Design and Project Management - The Hong Kong University of Science and Technology
- Oracle Cloud Infrastructure Certified AI Foundations Associate - Oracle University
