Technical Skills

Programming:

React.js, Redux.js, CSS,
JavaScript, Node.js, Express.js,
Laravel, Python, Django, C++

Databases:

MongoDB, MySQL, Oracle,
Apache Cassandra, Redis, Neo4J

Other:

UML, Git/GitHub, Docker, Object-
Oriented Programming (C++,
Python, Java), LLM tools

Education

Scientific Baccalaureate

Physics 2021-2022

Specialized Technician Diploma in Digital Development – Web Full Stack

ISTA – Institute of Applied Sciences and
Technologies 2022-2024

Engineering Degree in AI and Data Science (In Progress)

EMSI – Moroccan School of Engineering
Sciences 2024-2027

Langue

Arabic

English

French

Professional Summary

Full-Stack Developer specializing in AI and data-driven applications, with experience building scalable web platforms, SaaS solutions, ERP systems, and interactive dashboards. Skilled in React.js, Node.js, Django, Laravel, and Python, with strong knowledge of REST API development, SQL and NoSQL databases, and modern frontend technologies. Passionate about creating intelligent, high-performance digital solutions that solve real-world business problems through clean architecture and user-focused design.

Projects

Peak Online Library Web App

React.js, Laravel, MySQL

An e-commerce platform that allows users to browse, search, and purchase books. Includes secure authentication, a shopping cart, and an admin dashboard for inventory management.

Minibus Rental System - MVR

React.js, Tailwind CSS, MongoDB, NodeJs, ExpressJs

A web application for managing minibus reservations with a user-friendly interface. Includes a booking calendar, price calculation, vehicle availability tracking, and an admin panel to manage vehicles, users, and routes.

Lexiva AI - Research Assistant

FastAPI, LangChain, React, n8n

Lexiva AI is an advanced AI-powered research assistant designed to automate literature reviews through a multi-agent architecture. Researchers can upload scientific papers and receive both granular and high-level insights across entire research domains. The platform combines FastAPI, LangChain, Google Gemini, and n8n workflow orchestration to manage complex AI pipelines, document processing, semantic retrieval, and structured synthesis generation.

Sign Language Real-Time Translation System

Python, TensorFlow/PyTorch, OpenCV, CNN

Developed a real-time sign language translation system using CNNs to recognize hand gestures and convert them into words and sentences. Implemented a computer vision pipeline for real-time prediction, improving accessibility for deaf users.

MyTravelCircle - Tourism Platform

Python, Django, TailwindCSS, PostgreSQL

MyTravelCircle is a collaborative web platform designed to promote Moroccan tourism. It allows users to discover hidden gems, share their travel stories, and contribute to a growing database of local attractions.

ARAM - Full-Stack ERP System

Django, SQL, Tailwind CSS, PostgreSQL, ChartJs

Full-stack Enterprise Resource Planning (ERP) system designed to centralize and automate core business processes. It provides a unified platform for managing clients, orders, stock inventory, production workflows, and complex logistics operations.

Certifications (via Coursera and others)

- Specialized Technician Diploma in Full-Stack Web – ISTA (2024)
- The Unix Workbench – Johns Hopkins University (Linux)
- Interactivity with JavaScript – University of Michigan
- Oriented Programming (C++) – EPFL
- La recherche documentaire - Ecole Polytechnique
- Python for Data Science, AI & Development - IBM
- Introduction to Big Data - University of California San Diego
- Agile Project Management - Google
- Software Engineering: Software Design and Project Management - The Hong Kong University of Science and Technology
